

Clark Forklift

Clark Forklift Forklift Training - Currently, there are over 350,000 Clark lift trucks performing globally, and in excess of 250,000 in use in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 unique designs of lift trucks, with parts covering more than 120,000 specific items for all of its automated equipment. Your local Clark Dealer is your total source for availability of all your components requirements provided by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Internationally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark has a continual objective to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental restrictions, thus placing them in a dominant industry position.

Lean Production

Clark has chosen the extremely economical and beneficial structure of "Lean Manufacturing" for its assembly plants and use of resources. This structure was established to acknowledge the most successful method of manufacturing plant stewardship and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing costs. The new value engineering agenda combines progressive product improvement and delivers superior client support and service within the industry.
