

Boom Lift License Toronto

Boom Lift License Toronto - To operate an aerial boom lift, operators should be qualified through training which could be attained utilizing both classroom sessions and practical training and by obtaining a boom lift license. Instruction must be given with respect to the type of aerial lift that will be used on the job. A License is needed for anyone who works on or operates an aerial boom lift.

Vehicle-mounted aerial devices comprise the following work vehicles: extensible boom platforms, aerial ladders, vertical towers, articulating boom platforms, and whichever combination of these types.

There are a number of basic safety rules that apply to all boom lifts. Worker safety whilst within the basket is a main concern. Workers should have on a body harness and lanyard connected to the basket or boom. Never tie off to an adjacent pole, structure, or equipment. Workers should stand on the floor of the basket, and never climb or sit on the basket edge. The load limitations of the manufacturer must be followed.

Lift operators must be certified to operate an aerial lift. The manufacturer's instruction manual should be kept within the lift and the operator must know all aspects of that specific unit. Operators are responsible for making sure that safety measures are followed in the operation of the lift. Testing lift controls on a daily basis should be carried out. Set brakes and position outriggers (if they are utilized) on pads or a stable surface. If working on a slope, use wheel chocks.

Never move an aerial lift truck with an elevated boom whilst workers are inside the basket. Articulating boom and extensible boom platforms utilized as personnel carriers should have plainly marked, accessible, upper controls. Except for in emergency circumstances, lower controls should not be used to override upper controls unless permission has been given by the person in the lift.

Do not wear tree or pole climbers shall whilst working from an aerial lift.

Do not alter the insulated portion of the aerial lift.

Make certain that the booms are carefully inspected, that the machinery is correctly cradled and the outriggers are in the stowed position before moving.

When operating a boom lift next to power lines, make certain that the lines are di-electrically tested based on local rules.
