

Aerial Lift Train the Trainer Toronto

Aerial Lift Train the Trainer Toronto - The train the trainer program intended for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers would be given in-depth instruction on the workings of aerial lift machinery. The program is offered on an open enrollment basis and delivered at selected training sites. Prior to certification, trainers are assessed and graded based on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider within the business, we provide top notch hands-on training. We offer lots of chances to practice the techniques and concepts which are taught in the classroom. Together with hands-on experience, trainers develop general understanding of instructional techniques and machinery theory, field and classroom communication skills, and ability to successfully train and assess operators. Trainers would gain knowledge about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional methods included in communicating concepts within a classroom and/or field condition. Knowledge requires a training component to be effective in workplace conditions. There are three factors of machinery operation which the trainer must learn how to convey to operators: what to perform; how to do it; and the reason why it needs to be carried out.

In the program, trainers will be given the latest, detailed reference material to better help them convey the information to equipment operators. The guidebooks utilized, contain detailed information on all aspects of industrial mobile machine operator training. Included in the package are training aids which provide a visual reference to be able to enhance the learning experience. The equipment-specific training products contain important materials intended for both the trainer and the operator: overhead transparencies, videos/DVD's, safety message posters, equipment models; digital training aids and stability pyramid.
